

## **SUSAN NOVAK**

Susan came to ALMA with a broad background in animal science and agriculture, with a B.Sc. (Animal Science) and Ph.D. (Swine Reproductive Physiology), from the University of Alberta and a post-doctoral fellowship from Laval University, Quebec. Prior to ALMA, Susan was the Provincial Horse Specialist with Alberta Agriculture and Rural Development and also a Research Scientist at the University of Alberta. She has over 25 peer-reviewed publications in the areas of functional genomics and proteomics to study nutrition-fertility interactions in horses, swine and cattle. Since 2010, she has been the Research Senior Manager at ALMA, which has overseen over \$45 million in transformative leading-edge science research.
